METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES - INPATIENT HOSPITAL SERVICES (CONTINUED)

Methods and Standards for Payment Adjustments to Hospitals Qualifying as Disproportionate Share Hospitals

Effective October 1, 2009, the <u>DepartmentOffice</u> of Vermont Health Access (<u>D</u>OVHA) will make disproportionate share payments to hospitals as set forth in this plan.

VI. Eligible Hospitals

A. Minimum Requirements

In order to be eligible for disproportionate share payment, a hospital must:

1. Have at least two obstetricians with staff privileges at the hospital who have agreed to provide obstetric services to individuals entitled to such services under the Medicaid state plan. For hospitals outside of the Burlington-South Burlington Core Based Statistical Area (CBSA), the term "obstetrician" includes any physician with staff privileges at the hospital to perform non-emergency obstetric procedures.

The above obstetric-related criteria do not apply to hospitals in which the inpatients are predominantly individuals under 18 years of age, or to hospitals which did not offer non-emergency obstetric services as of December 21, 1987.

2. Have a Medicaid inpatient utilization rate of at least one percent. The Medicaid inpatient utilization rate is defined as a hospital's total Medicaid inpatient days (including managed care days) divided by the total number of inpatient days.
